work - aquabyte

Senior Machine Learning Engineer

San Francisco, CA

Feb. 2022 - Present

- Researched computer vision models for classification, keypoint detection, and 3D geometry to weigh salmon from a stereo camera system.
- Deployed multiple models to both AWS cloud environments and edge devices.
- Models are active in production running inference on millions of images a day.
- Comfortable working on all parts of the stack: modeling, data pipelines, infrastructure, backend, and frontend.

work - cisco meraki

Machine Learning Engineer

San Francisco, CA

Sep. 2018 - Jan. 2022

- Developed anomaly detection and timeseries forecasting models for networking issues and bandwidth use.
- Inventor on patent for internet outage detection (US11398970B2)
- Collaborate closely with PM to define product decisions and roadmap

education - brown university

B.Sc. Mathematics - Computer Science

GPA: 4.00

Sep. 2014 - May 2018

about me

I want my work to solve critical climate and environmental problems. I thrive with a challenging technical problem and owning a project from research to deployment. Outside of tech my interests include sustainable agriculture, trail running, and cooking with friends.
